

**PUPIL ACHIEVEMENT TRACKER (PAT) TRAINING****PAT Course 2 — Data Analysis****Data Analysis**

- Accessing the system
- Analysis of Value Added Charts
- Analysis of Contextual Value Added Charts
- Analysis of Non Stat Sats
- Question Level Analysis
- Custom Attributes Creation/Filtering
- Target Setting

This training course will enable participants to:

- Carry out question level analysis of the Optional or Strategy QCA tests
- Identify the curricular strengths and weaknesses of cohorts, classes, groups of pupils or individuals
- Plan appropriate action and intervention strategies to address issues raised
- Improve pupils' rates of progress and attainment

**Who should attend this course?**

This session is for the beginner or for those who need a refresher course.

The session focuses on evaluating school performance using question level and value-added graphs. Delegates will be provided with historical KS data of a sample school at the training session.

**Costs:**

All the above courses are priced at £250 per day, per person.

If you would like to book us to provide a training course for a number of people within your establishment, please contact us to discuss a reduced price.

**Other information:**

All attendees will be provided with course notes and an array of handouts. These documents can be used as manuals when working in 'the real world'.

All training will include two trainers. One will deliver the training while the other will 'walk the floor' and give one-to-one support to individuals.
