This training course will provide participants with the ability to:

- Install the software and import all their school data
- Provide their school with a complete data system to improve pupils' rates of progress and attainment
- Provide their school with a complete data system to identify the curricular strengths and weaknesses of cohorts, classes, groups of pupils or individuals

#### Who should attend this course?

This session is for the people who are responsible for maintaining their own schools Pupil Achievement Tracker Software. The session focuses on installing the software and importing types of data into the software. Delegates will be provided with internet access to download all historical KS data at the training session.

#### Costs:

All the above courses are priced at £250 per day, per person.

If you would like to book us to provide a training course for a number of people within your establishment, please contact us to discuss a reduced price.

#### Other information:

All attendees will be provided with course notes and an array of handouts. These documents can be used as manuals when working in 'the real world'.

All training will include two trainers. One will deliver the training while the other will 'walk the floor' and give one-to-one support to individuals.
